

25% OF YIELD CAN BE IMPACTED IN-SEASON. GET MORE BUSHEL FOR LESS WITH MERISTEM.

KEY PRODUCTS AND TIMING

HIGH-YIELD CORN PROGRAM

PRODUCT	TIMING	RATE	VALUE
 	Preplant or Post-Harvest	32 oz/A	Excavator® AMS + CycleStrike™ LR + BioFlex™ is an all-in-one blend of water conditioning agent (ammonium sulfate) and surfactants that aids in fertility, nutrient release and residue breakdown. CycleStrike™ LR uses microbes to speed nutrient release and residue breakdown, delivered through Bio-Capsule™ Technology to keep microbes active and alive until use. BioFlex is a specialty water pre-treatment that neutralizes the negative effects chlorine has on biological ingredients.
 	With N application	6 oz/ 50 units of N w/ Ammonia	Maintain™ Elite utilizes an improved formulation to extend nitrogen availability and uptake in addition to reducing nitrogen loss. Maintain Elite provides more calcium and enhanced polymer technology. It is intended for use as an additive to anhydrous ammonia and liquid fertilizer applied below ground.
 	At Planting	1 pall treats 50 units of corn at 80k seeds per unit.	HT MaxStax Corn copack is powered by Meristem's patented Bio-Capsule Technology giving farmers an easy-to-use system to deliver multiple, EPA-registered controls & other inputs via seed fluency. The copack includes the Prephyte ST biofungicide, GuardX bioinsecticide, GuardC biorematocide, Protectis beauveria bassiana microbe, Revline biostimulant, in addition to the base pall of seed fluency and IonLock™ Zn, Fe & Mn with Ether Enzyme Technology (lipase and mannanase).
 	At Planting	@ Plant: 2.5 lb/A Foliar: 1-4 lb/A pH Buffer: 0.5 lb/100 gal water	Upshift® C Pro powered by Ether™ Enzyme Technology an 11-56-0 concentrated starter fertilizer that enhances nutrient availability and early plant establishment using Ether Enzyme Technology. It includes chelated zinc to improve nutrient balance and enzyme activity. Its three-part Ether enzyme system (glucose oxidase, mannanase, and phosphatase) releases sugars and phosphorus from soil sources, activates the rhizosphere, and improves nutrient uptake. It can also be used in foliar applications or as
 	With N application	1.5 qt/ton UAN 2-3 qt / ton of urea	Maximize nitrogen spend with N-Gear® Dual Action, which provides both above and below ground protection, increasing nitrogen efficiency. It is specifically formulated for use in urea and UAN scenarios. Microbe-Friendly System
 	Vegetative Stages	2 oz/A	Revline® Early-Season contains two plant growth regulators found in nature that stimulate seeding and plant growth and improve root development. It also contains vitamins that aid transplanting.
 	V3-V8	1 qt/A	Harvestshield™ Evo is specifically formulated to protect and reduce yield loss of crops under abiotic stresses conditions such as drought, low or high temperature, deficient or excessive water, high salinity, heavy metals, and ultraviolet radiation.
 	V12-R2	1-2 qt/A	Homestretch® NKB-S Evo is a foliar designed to enhance yield and promote stress relief by combining two highly soluble and usable forms of potassium, along with boron and sulfur. Additionally, dextrose and fulvic acid promote plant vigor and speed plant uptake.
 	V12 - R2	12.8 oz/A	Revline® Late SeasonX is a plant growth regulator for enhancing shoot and root growth, photosynthesis, abiotic stress resistance, and mineral uptake. Fortified cytokinin delays senescence and supports reproduction, GABA helps the plant respond to stress and maintain metabolic function, and choline chloride supports stress resilience.
 		20 oz/A	Aquadraft® Extreme is a blend of water conditioning agent (ammonium sulfate), surfactants, drift reduction agents and humectants. Contains antifoaming agent to minimize foaming. Enlist™ approved
 		Fungicide & insecticide: 6 oz/A Herbicide: 3 oz/A Aerial: 0.3% v/v	Trutrack® Complete adjuvant is a premier drift reduction and deposition agent for use with herbicides, insecticide and fungicides. Trutrack Complete helps optimize deposition and droplet adhesion, which reduces bounce and increases droplet spreading for improved contact, coverage and canopy penetration. Enlist™ approved
