

# TAKE COST OUT

WITH EXCAVATOR® AMS POWERED BY CYCLESTRIKE™ LR

It's time to take a withdraw from your soil bank, here's the available nutrients in your corn stalks:

| The Nutritional Value of Corn Residue |                      |     |     |
|---------------------------------------|----------------------|-----|-----|
| Nutrient                              | Yield (bushels/acre) |     |     |
|                                       | 200                  | 250 | 300 |
|                                       | Pounds per Acre      |     |     |
| N                                     | 90                   | 114 | 136 |
| P <sub>2</sub> O <sub>5</sub>         | 18                   | 23  | 27  |
| K <sub>2</sub> O                      | 104                  | 131 | 156 |

## DIRECTIONS FOR USE

- 

**1. POUR BIOFLEX INTO THE SPRAY TANK TO TREAT THE WATER FIRST**
- 

**2. REMOVE THE SAFETY CLIP & CAP FROM BIO-CAPSULE & THE JUG CAP**
- 

**3. TWIST BIO-CAPSULE ONTO THE JUG**
- 

**4. PUSH BIO-CAPSULE TO DEPLOY MICROBES**
- 

**5. SHAKE THE JUG VIGOROUSLY FOR 10 SECONDS**
- 

**6. REMOVE BIO-CAPSULE FROM THE JUG & POUR INTO SPRAY SOLUTION**

## EXCAVATOR® AMS

AMS & NON-IONIC SURFACTANT WITH NUTRIENT RELEASE & CROP RESIDUE BREAKDOWN

POWERED BY

**CYCLESTRIKE™ LR**  
MICROBIAL NUTRIENT ACCELERATOR & RESIDUE BREAKDOWN

**MICROBILIZE™**  
MICROBE TECHNOLOGY DELIVERY SYSTEM

Excavator® AMS powered by **Cyclestrike™ LR** and **Microbilize™**, is the industry's leading all-in-one blend of water conditioning agent (ammonium sulfate) and surfactants that aids in fertility, nutrient release, and residue breakdown.

This combination makes it the perfect partner for water-soluble burndown herbicides like glyphosate. Not only will it perform as your key water conditioning and surfactant blend, but it will also enhance your fertility program by releasing key nutrients in a timely manner; allowing your current crop to have access to nutrients within the growing season.

**CYCLESTRIKE™ LR**  
MICROBIAL NUTRIENT ACCELERATOR & RESIDUE BREAKDOWN

**CycleStrike™ LR** uses microbes to speed nutrient release and residue breakdown, delivering them through **Bio-Capsule™ Technology** to keep microbes active and alive until use.

**MICROBILIZE™**  
MICROBE TECHNOLOGY DELIVERY SYSTEM

**Microbilize™ Microbe Technology Delivery System** provides the ideal carrier to ensure microbes stay alive once in the jug and have optimum conditions to begin multiplying and breaking down residue once applied.

**BioFlex™**

**BioFlex™** is a water pre-treatment that reverses the negative effects chlorine has on biological products. BioFlex turns chlorine into the safer chloride form, which is an essential plant nutrient, and is no longer harmful to beneficial microbes.

POWERED BY  
**BIO-CAPSULE™ TECHNOLOGY**  
INNOVATION DELIVERY SYSTEM

The patented **Bio-Capsule™ Technology** delivery system safely packages live microbes & other ingredients keeping biologicals separate and alive until the point of application.

**MERISTEM™**  
CROP PERFORMANCE

# TAKE COST OUT WITH EXCAVATOR®AMS

Take up to \$50 out of Traditional P & K Spend

Fastest Residue Breakdown in the Industry

Replace a Tillage Pass

Improved Soil Health

Reduce Cost of Adjuvants in Burndown Applications; *All-in-One Adjuvant System*

Get More Room Back on the Spray Trailer

Highest Effective Delivery of Live Biologicals to the Acre

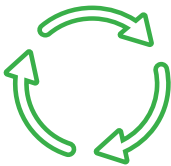

Reduce Cover Crop Yield Penalty

## ALL Plant Essential Nutrients are Tied Up in Organic Matter

### REDUCE RESIDUE

with accelerated breakdown that unlocks nutrients & promotes healthier soil.

### REUSE NUTRIENT VALUES

already tied up in crop residue to reduce fertility spend & maximize the nutrients already available on your acres.

### RECYCLE NUTRIENTS

back into the soil to feed the next crop, improve nutrient efficiency, & support higher yield potential.
