

## RECOMMENDED USE RATES

### Starter or Side-Dress Fertilizer

Use minimum of 2.5 lb/acre at planting, dissolved in adequate water.

For best use, use 0.5 lb concentrate/gal of water. DO NOT exceed 2 lb Upshift® C Pro per gallon of water.

### Direct Replacement for In-Furrow 10-34-0 Starter Fertilizer and All Other Ortho Phosphate In-Furrow Starter Blends

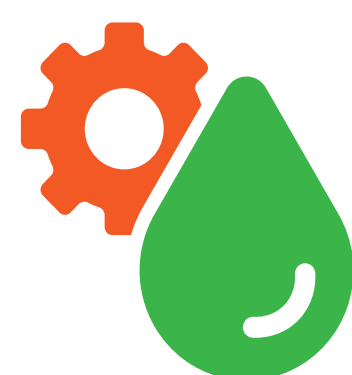

Replace each gallon of 10-34-0 fertilizer with 0.5 lb of Upshift® C Pro dissolved in 1 gallon of water.

**To replace 1 gallon of 10-34-0 fertilizer:** Dissolve 0.5lb of Upshift® C Pro concentrate in 1 gallon of water. Apply finished solution at same application rate as 10-34-0.

### Foliar Application

Use at rates between 1 to 4 lb/acre.

### Use as a pH Buffer

To use as a pH buffer for fungicides and herbicides, mix 0.5 lb per 100-gal water (results may vary based off water source pH).
